MANY SPECIAL THANKS!

YOU KNOW WHO YOU ARE!!

good seeds → don't worry!

the seeds are
planted,

& it starts growing!

... now relax

just some notes,
stream of consciousness,
random[?] & repetitive thoughts!

- completing healthy loops
- defining focus
- Relaxation etc.
- why, what is the human experience.

I hope, I can find
order, & organize these
notes. (one day).

agents, sponsors,
humans.

Welcome to contribute -

This "book" is open,
let all share "our blank
pages"

be the change you
wish to see in this
world

—
trust the 'natural', eternal,
flow that is within all
streams of consciousness!

if life was a trip,
what colour would it be?

abstract or realist?

what emotion would it be?
what images would it
bring?

- let it grow - "see it grow".
- be the face
- shine from within

it's fascinating, how it manifests itself. It all started with an intention to discover the soul.

To fully commit to the journey.

The Rainbow Dragon slowly reveal itself & it's magic.

the light that shines through darkness.

Slowly but surely, it transcends
identity, knowledge, culture.

it is what it is, the unity.
The 'I', that is the 'US'.

The warmth we all hope to
share with each other

-

1% vs 99%

"You do 1%, the other 99% happens."

Intuition!!! 

A dense, overlapping pattern of handwritten cursive letters, primarily 'g' and 'h', filling the page. The letters are written in a fluid, connected style, with some variations in slant and height. The overall effect is a textured, almost abstract composition of these two characters.

g.s. finding the right
